

CRYOSHUTTLE™

World Class IVF Shipping Services

Through Cryoport's Cryoshuttle™ local pickup and delivery service, we provide even more security and certainty for your patients' precious embryos, eggs and sperm. Our Cryoshuttle™ solution extends our market-leading Chain of Compliance™ processes even further with seamless direct handling, complete traceability and nonstop visibility of your patients' reproductive materials during local transport to and from clinics, laboratories, and hospitals, from your nearest Cryoport facility thus reducing any potential risk.

The Cryoshuttle™ solution mitigates risk with significant reduction in shock and orientation events through utilization of specially trained drivers and logistics management. Additionally, our solution supports enhanced traceability to ensure stringent regulatory compliance standards are met. With improved handling, security and traceability, you can have certainty knowing that your patient's reproductive materials will arrive at the destination on schedule and with documented sample integrity.

CRYOSHUTTLE™ KEY FEATURES:

- Local delivery & pickup service within proximal distance of all Cryoport Global Logistics Centers
- Ability to support regularly scheduled pickups and deliveries in accordance with requested schedules
- Drivers are highly-qualified, uniformed Cryoport employees who are trained to handle specialized equipment according to required processes
- Advanced routing software is utilized for the most optimal & efficient routes
- Custom-built vehicles are GPS-tracked with video surveillance
- Just-in-time deliveries and rush order capabilities
